WELCOME TO THE TRAA

"Hands-on Environmentalism" is what we do ...

Up Coming Events

TRAA Trout Hatchery

The TRAA trout hatchery is a popular activity of the TRAA as it's a great teaching tool with regard to the life cycle of a trout.

[More About This](#)

Rod Building

this will be a series of informal, hands-on sessions that will result in a spinning or fly rod that you have assembled and finished yourself

[More About This](#)

Salmonid Monitoring Program

Scale samples are taken from every tagged fish for DNA analysis to determine age and genetic classification

THE TRAA

In the spring of 1986 the TRAA was formed by anglers concerned with the state of the fishery in the Thames River watershed, particularly the dwindling smallmouth bass population in the North Thames River.

The TRAA is not a fishing club, although most members are anglers and share fishing as a common interest. We are a "hands on" environmental group who likes to work at a grass roots level.

The TRAA is a volunteer organization, governed by a formal constitution and by-laws. An elected Executive, with the guidance of the General Membership, sets the policies and direction for the TRAA.

The TRAA has a history of always having a core group of active members supported by those who just want to be part of the solution. Either way, every member of the TRAA is active in their advocacy for the health of the Thames River watershed and its inhabitants

PAST PROJECTS

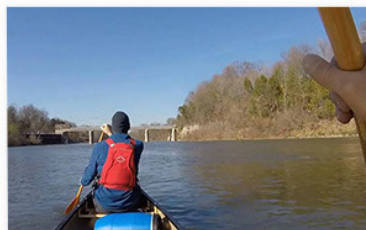

Participate, Help Out, Have Fun
Events & activities are what the TRAA's all about

This is what sets the TRAA apart from other clubs and organizations. You'll find us right in the water clearing obstructions from streams, measuring returning salmonids & taking scale samples for DNA analysis, education through trout hatchery tours & stream walks, being a voice for the Thames River watershed & its inhabitants and the list goes on.

OUR PROJECTS

TRAA Trout Hatchery Brown Trout Eggs Arriving Soon

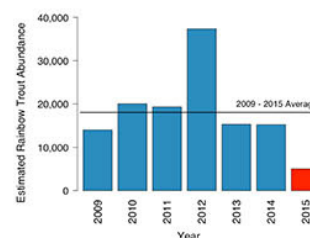

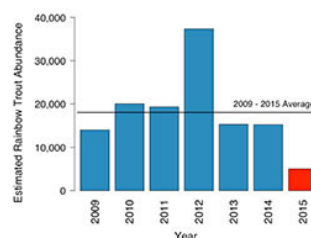

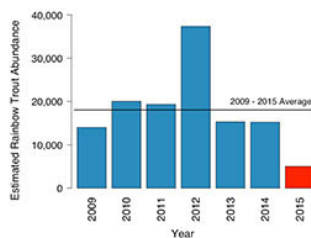

The TRAA trout hatchery is a popular activity of the TRAA as it's a great teaching tool with regard to the life cycle of a trout. Those involved with the hatchery get to see firsthand the development stages of the egg and the fry before their final release destinations to area streams.

Volunteers attend to the operation every day to maintain the health and well-being of the trout. As the saying goes, many hands make light work

here are ideally 2 members assigned for each day of the week. This is desirable as they can cover for each other and also allows us to match up anyone wanting to "learn the ropes" with an experienced mentor.

At this time there are still openings those wanting to be a part of the trout hatchery rotation. You can Contact Us or attend a TRAA General Meeting (see above) for more info.
